Claims 23-33 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 4, 2007. In addition, claim 22 stands withdrawn as also being directed to a nonelected species.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18, 20 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Neumann et al 5178549.

Neumann et al discloses conductive-contact holder 28 made of metal, ground contacts 69, and signal contacts 65 insulated from the holder, the holder providing connections between circuit boards 12b and 12c.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann et al as applied to claim 18 above, and further in view of Wilson 5037332.

Neumann et al substantially discloses the claimed invention except for a conductive pipe. Wilson discloses conductive pipe 60, and to provide Neumann et al with a conductive pipe thus would have been obvious, for better grounding.

Claims 21 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann et al as applied to claims 18 and 34 above, and further in view of the Background Art.

Neumann et al substantially discloses the claimed invention except for a ground-potential supply unit. The Background Art discloses a ground-potential supply unit, and to provide Neumann et al with a ground-potential supply unit thus would have been obvious, to provide ground potential to the overall assembly.

Claim 35 is rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann et al as applied to claim 34 above, and further in view of Longueville et al 5785534.

Neumann et al substantially discloses the claimed invention except for the insulating member being designed to correct impedance. Longueville et al discloses tubular shaped insulating members 16a, 16b, 17 which control the impedance of signal contact 15. It would have been obvious to form the insulating member of Neumann et al such that the impedance is at a desired value, as taught by Longueville et al, to facilitate signal transmission.

Applicant's arguments filed December 5, 2007 have been fully considered but they are not persuasive. Applicant's characterization of Neumann et al on page 10 of the remarks clearly shows that Neumann et al is a proper reference. It is not clear how the contacts of the instant invention extending out of holes in the circuit board is relevant to the claimed subject matter.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
